Anniversary Edition
1885-1925

GOLDBLATT'S Catalog *and* Handy Book

On this my 40th year of successful Tool making for the plasterers and masonry trades, I take this means to thank my thousands of friends who have used my Tools for so many years. There are some of you who have used my Tools from the very beginning of my career and still using them. There are hundreds and hundreds of plasterers and masons, who I knew as apprentices ~ today they are artisans and they all continue to send their orders to me, regardless in what part of the world they live.

As it was then-it is now, the apprentices and all young men embarking into any branch of Masonry always start and end with the use of GOLDBLATT "Trowel Brand" Tools. These young men realize that to make good, to properly learn the trade requires the best tools obtainable.

Sincerely,

Goldblatt Tool Company

TROWEL

BRAND

Kansas City, Mo.

Directions When Ordering Tools

Above all things be sure to write your full name and address on your order and please write as plain and legible as possible.

We Prepay the Transportation Charges

In order to relieve our customers of the red tape of paying express charges or other charges, upon arrival of tools, we prepay the parcel post or express charges, so that after you have dropped your order in the mail box, you are thru. We do all the rest. This applies to all goods shown in our catalog except those few items which are marked F. O. B. Kansas City.

In the past we have assumed the expense of the transportation charges, but conditions have been changing so that we cannot afford to continue this plan without increasing the price of our tools and this we dislike to do. It has always been our policy to hold down our selling price and under no circumstances make an increase unless the actual cost of production necessitates it.

So beginning as of January 2, 1925, we inaugurate the following plan, which will be a far more mutual change than had we made a change in prices, and this plan was worked out for the direct benefit of our customers. All items in the catalog therefore, that are priced delivered to your address are subject to following conditions:

When your order amounts to under \$3.00 include 15c for transportation charges.

When your order amounts to under \$5.00 include 20c for transportation charges.

When your order amounts to under \$8.00 include 35c for transportation charges.

When your order amounts to under \$12.00 include 45c for transportation charges.

When your order amounts to under \$15.00 include 60c for transportation charges.

When your order amounts to under \$35.00 include 75c for transportation charges.

When your order amounts to over \$35.00 include 90c for transportation charges.

THIS IS OUR 1925 40TH ANNIVERSARY CATALOG

**It supersedes all former issues and shows
the most complete line of its kind in
the world at the lowest prices**

**OUR PRICES ARE THE LOWEST
OUR PRODUCTS ARE ORIGINAL
OUR TOOLS ARE THE BEST
OUR SERVICE IS THE QUICKEST**

The above **FOUR FUNDAMENTAL REASONS** explain why we are the largest exclusive house of our kind. All our so-called competitors imitate us, they copy words, phrases, sentences and descriptions, also illustrations, from our Catalog and literature. This alone is an acknowledgment by them that we are the leaders in Masonry Tools.

REMEMBER, therefore, that to get the original and best tools, with the quickest service at the lowest prices, you should always buy **GOLDBLATT TOOLS**.

**BEWARE OF IMITATIONS
BEWARE OF IMPOSTORS**

HOW SIMPLE IT IS TO ORDER

Write name and address plainly. Always give catalog number of each tool wanted.

HOW TO SEND MONEY

Remittances should be made by Postoffice or Express Money Order, or by Bank Draft. If you send cash we suggest you register the letter.

The same day we receive your order we immediately mail you a memorandum bill acknowledging receipt of your order, and advise you how we are shipping your tools, over what railroad, express company, or whether by parcel post.

In the past, it has been obligatory on the part of our customers to remit with order. Those who do not find it convenient to obtain a money order when mailing us their order, may in the future ask us to send goods C. O. D. There will be an extra charge of 25 cents on goods sent C. O. D. You will save this amount when remitting with order. Please understand that we are not encouraging you to order C. O. D. but, announcing the privilege, which method you may use when it is most convenient for you.

**ADDRESS ALL ORDERS
and Make All Remittances to**

Goldblatt Terrazzo Workers' and Concrete Block Makers' Trowels—English Pattern

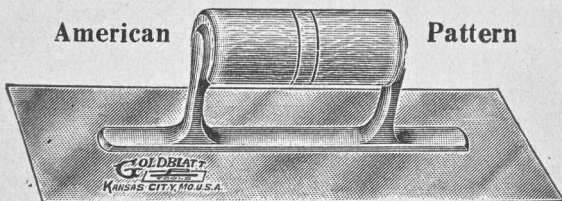

15 inches long—4¾ inches wide at heel—Tapers to a point.

Terrazzo Workers, also Concrete Block Makers do a great deal of slushing and spreading also very often tamp their work, and in using an ordinary Plasterer's Trowel, they frequently bend the handle down on account of leaning down so hard on their trowel. We have therefore originated these Double Post Trowels for that class of workmen. The blade and mounting on these Trowels are very heavy, so that they will stand much hard use. No. 23—Price, each.....\$3.95

Auto Spring Steel Bricklayers' Trowels

We are introducing our special line of Trowels, made from Automobile Spring Steel. In this special auto spring steel line of Trowels we have developed a superior quality which surpasses anything on the market. The expert Bricklayer has always wanted a Trowel that will not kink or warp in any fashion

Philadelphia Pattern

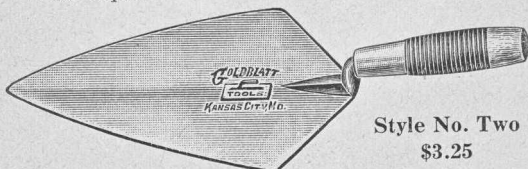

Style No. One
\$2.95

whatsoever, and now you can have it. Many a time you have said you would pay \$10.00 if you could get a Trowel that will hold up under all conditions. The time is now here, but, you don't have to pay \$10.00. No, you can obtain just such a Trowel at only, each.....\$2.95

Just think of being able to buy a trowel made of auto spring steel, the toughest material of which a trowel can possibly be made of, at only \$2.95. We know that we could get \$10.00 each for these trowels if we asked it, but we want all our customers

Special Philadelphia Pattern

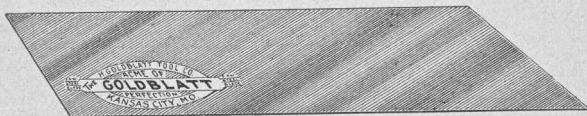

Wide Square Heel. With Leather Handle.

Style No. Two
\$3.25

to afford to own one of these special trowels at only \$2.95. When ordering just specify our Auto Spring Brick Trowel and give style number, also state size. They come in 10½ inch and 11 inch sizes only.

Extra Plastering Trowel Blades

10½ inch or 11 inch Size—Price each.....\$1.00

Goldblatt Tool Co.,

Kansas City, Mo.

With Reference to Plastering Trowels Shown
on Pages 2 and 3

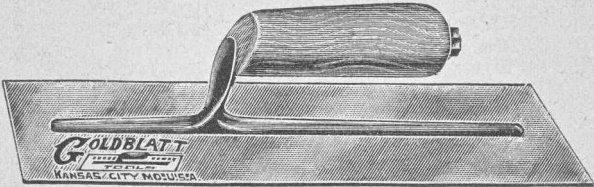

We make low, medium and high mounts. By this we mean the space between the upper side of mounting and the under side of handle. As a rule, a plasterer with a small hand wants a low mount, one with a medium size hand wants a medium mount and one with a large hand wants a high mount. If above is not specified in order, we always ship Trowels **medium mounts**, and when sizes are not specified we always ship 11x4 $\frac{5}{8}$ inch. We Always Recommend 10 $\frac{1}{2}$ inch or 11 inch Size.

We also make these Trowels in Finishing and Browning weights. When Finishing Trowels are wanted always follow number with the letter F. When Browning weights are wanted always follow number with letter B. For example No. 2F; No. 2B; No. 250F, etc.

Goldblatt Plastering Trowels

\$2.25 Grade with Trowel Steel Blade

This is similar to our No. 2F shown on Page 2.

No. 1F—Finishing Trowel. made of 24-gauge best trowel steel, highly polished and etched: mounting extends within three-fourths of an inch from each end of blade and contains **ten large rivets**. This leaves plenty of spring for finishing; also prevents lime from working between blade and mounting. Our Handles are shaped so as to fit your hand, and the Trowel is balanced so as to please the most particular mechanic.

Made in the following sizes: 4 $\frac{1}{2}$ x10 $\frac{1}{2}$ inches, 4 $\frac{5}{8}$ x11 inches and 4 $\frac{5}{8}$ x11 $\frac{1}{2}$ inches. Price, each, any size.....\$2.25

No. 1B—Browning Trowel, for rough coating, made of 22-gauge **best trowel steel**, which is a heavier blade than that used on our Finishing Trowel. Otherwise made in same sizes as the No. 1F.

Price, each, any size.....\$2.25

Goldblatt Melvin Pattern Plasterers' Brushes

With Long Handle

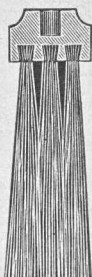

We developed this Brush for those Plasterers who desire to get away from the Leather Bound Brushes, and at the same time have a Brush that is not any heavier than the regular Leather Bound ones. The sale on this Brush has been so large that we have hardly been able to produce them fast enough.

The general construction of this Brush is very similar to the heavier Kansas City style Brush shown on opposite page, only that this one is of three-row construction instead of five rows.

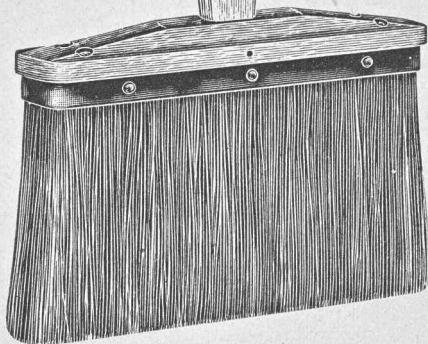

Like our guarantee on all 'Trowel Brand' Tools, you have our assurance that if Brush is not perfectly satisfactory your money will be refunded.

The largest exclusive business of its kind

Plasterers' Wood and Aluminum Darbies

Made of selected soft white pine of vertical grain, 48 inches long, $3\frac{5}{8}$ inches wide, $\frac{1}{2}$ inch thick. Round handle 4 inches long, rib 18 inches long.

No. 5—Price, each.....95c

Our Aluminum Darby, light, strong and more flexible than Wood Darbies; 44 inches long; $3\frac{1}{2}$ inches wide; $\frac{1}{8}$ inch thick. The 4-inch round handle is detachable. Rib is 18 inches long. It's a fine tool for fine work.

No. 7.....\$3.00

Made of the finest mahogany obtainable. If you want a real fine Darby buy one of these Mahogany Darbies—same size as the White Pine. It's a Dream.

No. 6—Price, each.....\$2.25

Unlike all other Wood Darbies on the market which are made of $\frac{1}{2}$ " material and always warping and kinking—We make ours out of 1" material. We do not saw the 1" material in two thicknesses. We work the 1" material down to the $\frac{1}{2}$ " thickness. We then select every board and treat every

Darby Board like you would treat a baby. We waste a lot of material in making our Darbies in this way, but we believe in making them right. That is why our Wood Darbies, especially our Mahogany Darbies are still in use after dozens of the cheap ones have warped, kinked and you only know what else. Don't buy a Darby from inexperienced people because it's cheap.

While our Darbies may be slightly higher in price, there are good reasons for it and furthermore, they are much cheaper in the long run.

Tile Marker Deluxe Patented

Side View.

Full Size Side View of
our Patented Swedish
Razor Steel Blade as
Used in DeLuxe Tile
Marker.

You have always wanted a Tile Marker like this. You have dreamed of a Tool that could be pulled along the line of a straight edge without that fear of cutting too deep in one line and too shallow on the next line. You have dreamed of a Tool with which you could do an extra fine job of marking imitation tile in Bathrooms and Kitchens without that fear of cutting ugly uneven grooves and utterly ruining the

looks of the job. You have often thought that if you could just get your hands on a Tool like this that you would welcome every job of this kind that was offered you and that you would then be able to please your clients in every Tile Marking Job. That uncertainty is what always worried you. That same uncertainty can now be banished from your mind forever.

Our patented DeLuxe Tile Marker, which is shown above, overcomes all obstacles formerly encountered in this work. It is so devised that even an apprentice can use the tool and accomplish a perfect job of Tile Marking. It is impossible to cut wrong, too deep or too shallow. Simply pencil mark the lines, this can be done with the aid of a compass and a straight edge. Squares can be laid out in the following most popular sizes—4x4 inch, 6x3 inch, or 6x6 inch. This little wonderful tool with its keen Swedish Razor Steel Blade will do the rest.

Made of Aluminum. Weighs only $3\frac{1}{2}$ ounces, $6\frac{1}{2}$ inches long. Can be carried in Vest Pocket like a Fountain Pen.

It's worth a \$10.00 bill, but produced so that every Plasterer can afford it at only.....\$1.25

Extra blades 15c each or 2 for a quarter.

Just specify DeLuxe Tile Marker.

Be an Expert TILE MARKER!

*Earn
Big
Money*

In the above picture you will see just how our Patented Deluxe Tile Marker is applied to actual work of cutting the small joints on hard surface plastered walls. Notice the convenient shape of the tool. Notice that it is just as easy to cut into the corners and angles, as it is to cut along the middle of wall. Notice how the plaster comes thru that keen sharp blade in a steady uniform stream like a liquid comes thru the small end of a funnel. Never out of order, you can always depend on it.

Blades are self sharpening and will last a long time before worn out. New blades can be inserted in one minute.

Infringements in design, construction of body or blade will be prosecuted to the full extent of the law.

The Oldest and Largest Exclusive Business of Its Kind

**Goldblatt "Trowel-Brand" Plasterers' Pants—
Back View
White Drill Material**

Our Special Plasterers' Pants illustrated here need no introduction.

To those who have never used them we desire to say these Pants are not just overalls. They are cut and tailored like good dress trousers and they fit like real trousers, you will find real comfort when working in these pants.

They are made purposely for those plasterers who do not like Bib Overalls, and who prefer to use a belt instead of suspenders. They have two large hip or back pockets, two smaller ones on the side of legs for pointing trowel and other small tools, and a watch pocket at waist line. The two hip pockets and watch pocket have flaps which prevent plaster and mud from falling in them. They are made of best quality white Overall Drill and are strongly made. All sizes up to 42 waist.

No. 20—Price per pair \$1.60

For Sizes from 44 waist up to 48, add 25 cents per pair to above prices.

When ordering Pants, do not fail to state sizes wanted. Give waist and length measurement.

For size from 44 to 48 inclusive add 25c per pair to above prices.

**Goldblatt "Trowel Brand" Plasterers'
Work Shirt**

This shirt was designed especially for Plasterers. You all know the disadvantage in the ordinary undershirts, which are so skimpy and their short sleeves getting shorter every time they are put on. You know, too, how difficult it is getting them on and off.

It's different with this special Plasterers' Shirt. It's made extra roomy and large and the sleeves are extra long. Easy to get on and off, also notice the neck, which fits close around you to keep the plaster and lime from burning you, with one real good button on the back. The long sleeves keep your wrists and arms protected.

Made of superior quality cream color Balbriggan of a weight desirable in summer or winter. Made in sizes 38, 40, 42, 44 and 46.

Adjustable Leveling Stands

A practical device, light, compact and at low cost, for holding level with sights attached. It enables the user to run grades for ditches, drains, etc., and to set profiles for foundation work very quickly without incurring the expense of surveyor's instruments. It consists of two parts, a base and a rotating level carrier. The base can be attached by set screws either to one stake or crow bar or to three stakes forming a quickly improvised tripod, or can be set on a per-

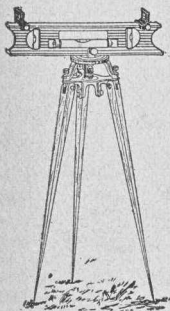

manent object, as a box or stone. The level carrier is then accurately leveled and locked to this base. Made for use in connection with either wood or iron levels.

No. 38— $4\frac{1}{2}$ " long by $5\frac{1}{2}$ " wide—(For holding metal levels)—

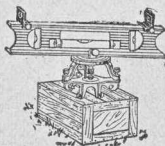

Price, each\$2.95

No. 48— $4\frac{1}{2}$ " long by $3\frac{1}{2}$ " wide—(For holding wood levels)—

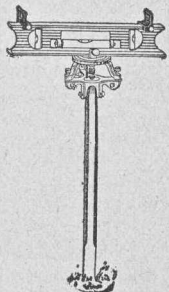

Price, each 2.95

Here shown as attached to three stakes, forming a quickly improvised tripod.

Or can be set on a permanent object, as a box or stone.

Or can be attached to one stake or crow bar.

Goldblatt "Perfect" Bricklayers' Joint Raker Patented

As Necessary as a Trowel. **ONLY 35c**

We also call this our "Trowel Mate" Joint Raker because it's as necessary as a Trowel.

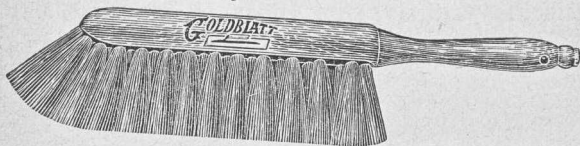

This is indeed a universal tool, and is becoming more popular all the time. We have sold thousands of them to satisfied users and can recommend them very highly to all our friends. It has two cutting heads, a long one for raking plain head and bed joints and a short one for raking head and bed joints in angles, at corners or where projections are made in the brickwork. All joints between $\frac{1}{4}$ inch and $\frac{3}{4}$ inch can be reached by this tool. No joint can be made that cannot be properly raked by this tool in a quick and neat manner.

In operation the tool is placed with the convex side against the face of the wall so that the right angled cutting head enters the joint, then by drawing the tool along the joint the cutting head plows the mortar out and throws it clear of the wall, leaving a neat square joint and a perfectly clean wall.

No. 5—Price, each..... 35c

Or 3 for \$1.00

Bricklayers' Dust Brush

This brush is used for brushing joints after they have been struck up with jointer. It is made of mixed Tampico. The whole Brush is 14 inches long. Brush part is 8 inches long.

No. 812—Price, each $2\frac{1}{8}$ "..... 60c

No. 815—Price, each (Pure Grey Bristle $2\frac{1}{8}$ ").... \$1.00

No. 817—Price, each (Pure Grey Bristle $2\frac{1}{2}$ ").... 1.25

Goldblatt—The largest business of its kind

Bricklayers' Combination Joint Raker

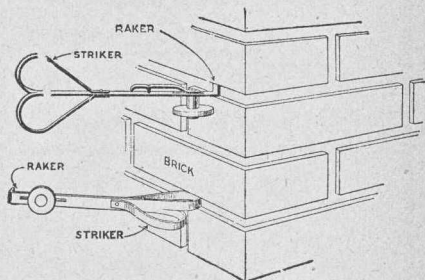

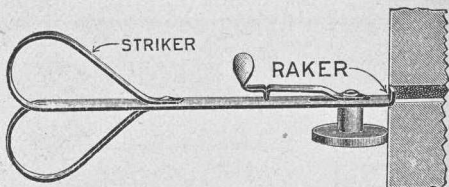

This Raker, Jointer and Striker combined makes a smooth, perfect raked out joint. There are no screws or nuts to work loose. The revolving wheel prevents wear and will not mar the work or cause irregular depths in joints as where other rakers are used. The wheel revolving against the brick makes it easier for the mechanic to handle the tool.

The handle of the Raker forms two Strikers which will clean out any mortar that may collect.

To adjust the Raker swing lever to the side and move the wheel back or forward to the depth desired, then swing the lever back in place and the wheel is positively locked in place. This Raker is made of a special grade of steel, thoroughly tempered, making it a first-class tool in every respect. Highly recommended by leading architects and mechanics.

Length 8 in., weight 6 oz., for $\frac{1}{4}$ to $\frac{1}{2}$ -inch joints.

Ever-Lastic Calking Compound

For Calking Around Door Jams, Windows, etc., thus sealing buildings and protecting against dusts and drafts. Proper Calking of every building is an important part in construction work.

Putty will not do. Plaster will not do. Mortar will not do. All have been tried, and found that they will not adhere to wood and other building materials. These materials above mentioned crack and fall out.

Jen-Sal Ever-Lastic Calking Compound does not crack and fall out.

Contractors' Leveling Instruments

No. 101

who have occasion to use such an instrument. The upper plate is connected to the tripod head by a ball and socket joint, and is leveled by the leveling screws. This plate is recessed to contain a graduated arc for taking angles, and on the plate is the frame with level and sight tube for taking horizontal angles only. The nickel-plated SIGHT TUBE on this instrument is PLAIN, with no lenses, 12 in. long, with small eye aperture and the usual cross wires. All other features are precisely the same as the transit described and shown below.

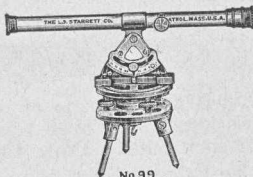

Extension Legs are adjustable from 2 feet 6 inches to 4 feet 6 inches.

Directions for setting up and using are inclosed with each leveling instrument.

Weight, packed in box for shipment, approximately 20 pounds.
No. 101 A—Price, complete.....\$13.50
F. O. B. Kansas City.

Contractors' Transits

To meet the demands of contractors, builders, carpenters, farmers, and others for a transit and level, low in price yet sufficiently accurate for their needs, we have developed the Starrett transit and level. These instruments are very simple; they do not have the expensive attachments found on engineers' instruments. The builder and contractor find them indispensable in laying out building lots, locating batter boards, leveling foundation walls, and in pouring concrete floors. Farmers and ranchers use them in laying out modern tile drainage systems, irrigation ditches and new roads. Millwrights and machinists may use the Starrett level to advantage in leveling and aligning shafting in mill or factory. In general, it may be said that the Starrett transit or level can be used for the same purpose as any engineer's transit and level. Free from complications and confusing adjustments, any man may use these instruments without the knowledge of higher mathematics and engineering principles necessary for using the much higher priced engineer's transits.

No. 99

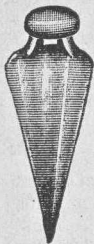

A comprehensive booklet explaining in detail the uses and illustrating practical problems accompanies each instrument.

Furnished with adjustable extension legs as the one shown at top of page.

Weight ready for shipment about 22 lbs.

Mercury Plumb Bobs No. 87

The improvement consists in our patented device for fastening the string without a knot to tie or untie, simply by drawing it into the peculiarly slotted neck at the top, after unwinding the required length, when the bob will hang perfectly true.

These plumb bobs are made from solid steel, bored and filled with mercury. Noteworthy features are their great weight in proportion to size, low center of gravity, small diameter, hardened and ground points, knurling on the body and the simple and effective device at top for fastening end of line after winding up. Nickel plated. Each is provided with a braided silk line.

Aluminum Line Level

The "Goldblatt Line Level" consists of an accurate, proved level glass placed in a three-inch aluminum tube with "spring silver" end pieces and hooks formed from one piece of metal. The end pieces are attached to the tube by silver rivets that pass through the tube and through lugs at top and bottom between the hooks and the center of the level, thus preventing the hooks from pulling out of alignment in case of severe strain or rough usage.

Every level is carefully tested and proved and is guaranteed to be accurate.

Every plasterer, bricklayer or cement worker should have one of these little tools in his outfit. They weigh only one-half ounce and take up about the same space as a fountain pen if carried in the pocket. The uses to which they can be put are almost as many as those of the old style wood level. They take the place of a straight edge and level and do the work more accurately.

No. 14—Price, each.....50c

Perfection Level and Plumb Attachment

Always On The Job

Can Be Attached To Any Straight Edge. Can Also Be Used on a Steel Square. Every Mechanic should have one

No. 10—Level Attachment. Price, each.....95c

Aluminum Line and Surface Level Combined

Easily attached to line—Spring Clips prevent the level from falling off the line—accuracy guaranteed. Weighs only $\frac{5}{8}$ of an ounce—because of its shape this line level can also be used as a surface level—otherwise this Tool is similar to the line level shown on opposite page—after you own one you will say it's worth a five spot.

No. 15—Price, each.....90c

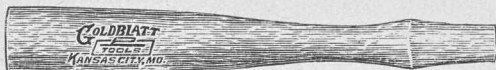

Cross Test Level

As the cut shows, two levels in one frame, extending at right angles $2\frac{3}{4}$ inches each way. The level weighs but 4 ounces. When placed on work to be leveled in both directions, it will not be necessary to move the tool. It is japanned; with nickel-plated ends.

Mechanics' Line Blocks

Once tried, always used.

An absolutely new, efficient and indispensable article, most essential to Bricklayers, Stone Masons, Carpenters, Structural Iron Workers, Concrete Workers, Draftsmen, Painters and Crafts, using lines for Snapping, Chalking and Measuring purposes.

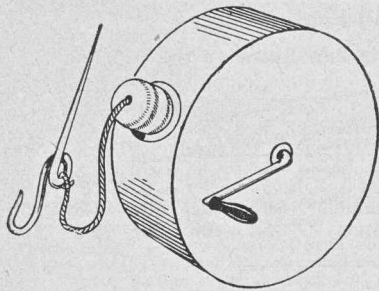

Directions:

Hold line block with Cam on top, insert line from bottom up, through square hole then back under Cam, turn Cam down tight. Thread the second block the reverse of the above so the lugs on plate will be on the extreme opposite ends, if the line cannot be placed exactly where desired a further adjustment may be had by moving line up or down in slot or under cam.

Eventually the line block will be an important accessory to your Kit. Try them. Price 75 cents a set.

Remember we pay postage and deliver to your door

Self-Chalking Chalk Line

Reel holds 50 feet of line and chalk enough to last for years. Can't get out of order.

Three inches in diameter, 1 inch thick, weighs 4 oz.

Always ready; stick the awl in wall, draw the line and snap.

No. 444—Each \$1.25

Chalk Line Holder

Will hold easily a 50-ft line. Fasten end of line to the steel pin on handle; always ready for use, requiring no driving of nails or helper. When not in use the steel pin and handle sinks in end of spool. Perfect satisfaction.

Plasterers' Automatic Wall Measurement Tables

Showing Total Number of Square Yards in Rooms of Various Sizes.

To be used in figuring amount of plaster required for given areas. Directions for Use

Example: To obtain the number of square yards in a room 15x14x7.6. Turn to the table giving measurement of rooms with 7.6-foot ceilings; follow down the column of figures on the left until you come to 15, then follow the figures to the right until you come to the figures directly under the figure 14, at the top of the page; the answer is 71.6 square yards. When the half-foot comes in the dimensions of a room, both ways, take the next largest number on one side. When it comes on one side only, add one yard and it will be close.

There Is Something About Goldblatt Tools That Makes Every User of Them a Permanent User

READ THESE TESTIMONIALS

Mar. 27, 1924.

Gentlemen:

Received my tools all O. K. Well pleased, and extremely so with the 2CF trowel. It's a trowel I've been looking for for a long time. I would have written you sooner but expected to send another order before now, nevertheless I will want more tools shortly. Thanking you, I remain

Respectfully,

J. C. Piell,

New Brunswick, N. J.

Every User of Goldblatt Tools Recommends Them

Mar. 31, 1924.

Dear Sirs:

I am this day in receipt of the too's I ordered of you and as usual they measure up to the "High Standard" for which Goldblatt Too's are noted. Thanking you for all past favors, and wishing you continued success, I remain

Yours truly,

Ray Rogers,

Fremont, Neb.

Every Order Receives Our Personal Attention

May 5, 1924.

Dear Sir:

Inclosed find money order for the above list of tools. Will say you put out the best plastering trowel I ever used. I have been using one of your No. 250F Finishing Trowels for a year and it is as straight as the day I got it, and I have been using trowels for over 30 years. Please mail me a catalog, as I had to borrow one from my apprentice,

Yours,

F. E. Werner,

Roseburg, Oregon.

Send Us Your Orders - You Will Receive Just What You Want

Dear Sirs:

Am in need of some Tools and Supplies, what have you to offer? A short while ago I ran across one of you little catalogs in which I saw just the things I want, but I could not get the catalog as the bricklayer valued it too highly to part with it. Please send me one.

Yours, very truly,

Frank A. Miller,

6 Miller Ave.,

Batavia, N. Y.

Goldblatt Tool Co.,

Kansas City, Mo.

These TESTIMONIALS Are the Proof of the Pudding

Dear Sir:

I have used several different trowels for finishing concrete but I find that the Goldblatt No. 2CF Trowels are the best I have used. Will you please send me one of your catalogs as I lost the one I had and I want to send you an order.

Stanley Glish,
c/o Sinclair Gas Plant No. 9
Box 6, Shidler, Okla.

Sept. 15, 1924.

Dear Sir:

Tools received with great satisfaction. I am just tickled to death over them. Sir you will find inclosed 25c in stamps, balance due you. I am very sorry I made such a mistake. I will close by saying I am expecting to give you another order pretty soon as I am well pleased with this one. Your customer.

Very truly,
G. S. Patterson,
Biloxi, Miss.

We Receive Thousands of Similar Testimonials

Dear Sir:

Enclosed please find money order for \$12.30. I know your tools are of the best, because I have heard many plasterers praise them highly. I remain,

Yours truly,
Harvey Easley,
San Pedro, Calif.

April 26, 1924.

Dear Sir:

Rec'd my order a few days ago, everything more than satisfactory. Showed the tools on the job and as a result am sending this \$25 order. Doesn't take a salesman to sell your goods. They sell themselves. Please send some more catalogs.

Respectfully,
R. P. Bryce,
Ft. Wayne, Ind.

Every User of Goldblatt Tools Is a Satisfied User

Sept. 28, 1924.

My Dear Sir:

I received my order from you and want to say that the Brush and Finishing Trowel is by far more than I expected. I also want to say that the Sand Finishing Carpet I got from you is a big bargain. I will recommend any and all of Goldb'att Tools to any plasterer or brick mason anywhere, anytime. I am gradually replacing my worn out tools with Goldblatt's. Let anybody ask me about your tools and you will gain another customer.

Your old customer,
Tom Eckerd,
Elk City, Ok'a.

IMITATORS

Have Not Only Attempted to Imitate the
General Style of Our Trowels

But we have discovered some who imitated our etching design on the blade. So to safeguard and protect our friends and customers against impostors, we are now using a steel die with which we indent our Trade-Mark in the post of every trowel.

**YOU CAN, THEREFORE, ALWAYS
IDENTIFY THE GENUINE GOLDBLATT
TROWEL BY THE INDENTED TRADE-MARK
ON THE POST**

What others have to say about GOLDBLATT TOOLS

Your No 12 Brass Bound
Artisan Plum Rule
which I bought of you
about two years ago
is a dream. I often
wonder why I did
not have one long
before. Every brick-
layer will say the
same after he once
uses one of them.

I received Tools to-
day in perfect Cond-
ition and glad to
say they are exactly
what you claim them
to be. From now on
I will use only
Goldblatt Tools

A friend of mine want-
ed to order some tools
so I loaned him my
Catalog. Now I need
some. Tools and have
no Catalog. Please
mail me a copy at
once. I can not work
without your Tools

Enclosed find Order
amounting to \$10.90
also a money order
for this amount.
Please ship immed-
iately as you
have always
done before.

I have worked
at the business
for 30 years and
you make the
best Tools I
have ever used

For years I used
your tools and for
years I read your
testimonials. Now
I hope others will
read my testimonial.
Your tools are so
different and so
superior to the ordinary
run of Tools that
you deserve a testi-
monial from me.

The Genuine Goldblatt Hard Vulcanized Fibre Tool Case

An Exact Side View
Reproduction

Very Popular Among Plasterers.

An Exact Top View

Please Notice Every Detail

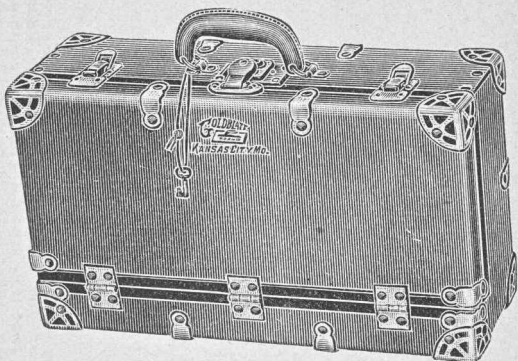

In the construction of this popular Tool Case. A great deal of pains was taken to produce these pictures so that you can visualize exactly what this wonderful Tool Case is. Note the sturdy construction. Note the excellent quality lock and catches and other trimmings. Not a splinter of wood in it. Worth its weight in gold. A high quality product surpassing in quality, workmanship and durability all imitations at prices even lower than imitations.

20" Size—Each.....\$8.65

24" Size—Each.....\$8.95

For further description see preceding page.

Our Junior Hard Vulcanized Fibre Tool Case

An Exact Side View Reproduction.

A very popular size for Bricklayers, Tile-Setters, Lathers, etc., etc. Very often preferred by some mechanics instead of the canvas tool bag.

18 in. long. 10½ in. high. 6½ in. thick.

No. 8—Price, each.....\$4.75

Elk City, Okla., May 19, 1924.

Dear Sir:

I received the margin trowels I ordered from you and want to say they are more than a good mechanic can afford to be without at any price. I would not take twice what I paid for mine. There are four plasterers in the same company with me and I have convinced them that Goldblatt Tools are the best on the market. We are going to send in a real order next week. One of the boys was going to have a tool case made and I told him about the tool cases in the Goldblatt Catalog, now he wants me to order him one, so you may send us one of the hard vulcanized fibre tool cases, the largest size. The one the man is standing on in the catalog.

TOM ECKERD.

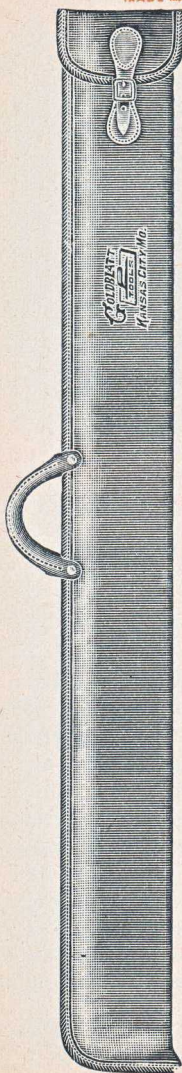

Our goods are original and cost no more

LEVEL COVER OR CASE—Protect Your Plumb Rule

TROWEL  BRAND

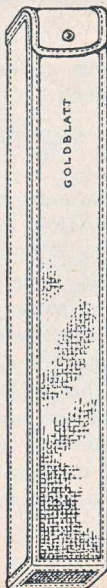

TRADE MARK

REGISTERED

Made of best quality brown color canvas. Made for hard and long wear. Well worth the money you spend on one if you take a pride in the looks and condition of your Level. These Level Covers will fit any four-foot Plumb Rule or any Plumb Rule of shorter length.

No. 5—Price, each.....\$1.25

LEVEL COVERS

Will Fit Wood or Aluminum Levels

Made of best quality brown color canvas.

No. 1—For 18 in. Levels. Price, each.....\$0.70

The vials of all our aluminum Levels are set the same way as in our wood Levels, covered by plate glass on both sides protecting them and making these important parts dust, dirt and waterproof. The great advantage in our wood and aluminum Plumb Rules over all others is that they are of double construction. No matter how they are picked up they are always in position for use, while the duplicate plumb glasses, one at the top and the other just below the center, both reading the same way, add to its convenience. For low work, upper plumb glass is read, and for overhead work the low glass is in range. Our complete line comprises the most popular Levels made.

PLASTERERS', BRICKLAYERS', TILE-SETTERS' AND CEMENTERS' SHORT LEVELS

No. 4—Price, delivered to your door..... \$1.75

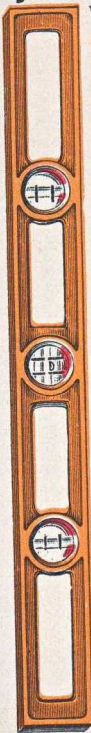

The construction of all these Levels is identically the same as the construction in our Mason's Levels, on following pages. This is a white pine stock, 18 inches long.

No. 10—White Pine. Very narrow and neat 18 inches long.

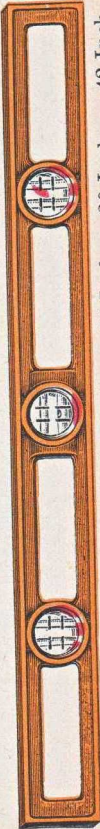

Price, Each..... \$2.00

ALUMINUM LEVELS

No. 9—Length.....12 Inch
Price, Each, delivered to your door..... \$2.75

18-Inch \$3.50
24-Inch \$4.00

No. 11—Length.....24-Inch
Price, Each, delivered to your door \$4.25

28-Inch \$4.75
30-Inch \$5.50
42-Inch \$7.50

Our Line of Levels is the Best and Our Prices Are the Lowest.

Bricklayers' Plain and Brass Bound Plumb Rules

No. 1—This Rule is made of white pine, is 4 feet long, 2 3⁄8 inches wide and 1 3-16 inches thick. It has four plumbs and two levels. Plumbs or levels either end or edge up, and has two hand-holes. It is a narrow, light and very neat plumb rule. (Guaranteed to be on the dot.)

No. 1—Price, delivered to your door.....\$3.50

No. 2—This Rule is same size as No. 1 and made exactly the same as the No. 1, but it is brass bound around all edges and corners, and has Brass End Plates.

No. 2—Price, delivered to your door.....\$5.50

No. 20—Solid Mahogany—Brass End Plates Very Narrow and Neat—4 feet long.

Price, delivered to your door.....\$5.65

All Our Plumb Rules Have the Permanent Painted Marks on the Vials and NOT Wires

The Oldest and Largest Exclusive Business of Its Kind

No. 333—3 piece—White Pine Center with Hardwood Edges, Brass End Plates—Very Narrow and Neat
4 feet Long

Price, delivered to your door.....\$6.75

No. 3—White Pine—Brass End Plates, Very Narrow and Neat—4 Feet Long

Price, delivered to your door.....\$4.50

No. 40—White Pine Brass Bound—Brass End Plates, Very Narrow and Neat—4 Feet Long

ANSWERS YOUR QUESTIONS

Guide No. 1—Over 431 pages—1200 Illustrations—Few of the important features:

- How to know the different kinds of wood.
- How to use the different kinds of wood.
- Complete detailed information on nails and screws.
- How to use carpenter's tools.
- How circular and band saws are handled.
- How to use the steel square.
- How to sharpen tools.
- How to file and set saws.
- How to make wood joints.
- Complete information regarding joints and joinery.
- How to build furniture.
- How to make a tool box.
- How to make a work bench.
- How to make "horses" or trestles.
- How to make a mitre box.
- How to make a mitre shooting board.
- How to plumb and level work.
- How to use the chalk line.
- How to lay out work.
- How to use rules and scales.
- How to use vises and clamps.
- How to use all of the carpenter's tools, with over 900 illustrations showing specifically how.

Guide No. 2—Over 455 pages—400 illustrations—some of the big features:

- How to understand carpenter's arithmetic.
- How to understand geometry.
- How to understand trigonometry.
- How mathematics is simplified for carpenters.
- How to solve mensuration problems.
- How to estimate the strength of timbers.
- How to proportion beams.
- How to use drawing instruments.
- How to make architectural drawings.
- How to read plans.
- How to survey.
- How to draw up specifications.
- How to estimate the cost of buildings.
- How to build houses, barns, garages, bungalows, etc.

Guide No. 3—Over 255 pages—400 illustrations—some of the principal subjects covered:

- How to excavate foundations.
- How to build foundations.
- How to make foundations water proof.
- How to erect post foundations.
- How to build forms for concrete foundations.
- How to proportion foundation footings.
- How to frame houses.
- How to set girders and sills.
- How to construct built-up sills.
- How to frame joists.
- How to allow for variation of joists.
- How to construct a well hole.
- How to frame a studding.
- How to frame corner posts.
- How to lay out and cut braces.
- How to attach lath to corner posts.
- How to frame temporary and permanent braces.
- How to frame girts and ribbands.
- How to set window frames.
- How to frame braces and partitions.
- How to distinguish various types of roofs.
- How to distinguish various rafters.
- How to use the settings 12, 13 and 17 on the steel square.
- How to lay out mitre cuts.
- How to use tangents, and full detailed information covering sky lights, scaffold and hoisting apparatus.

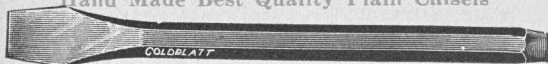

Guide No. 4—Over 448 pages—400 illustrations—some of the salient points covered:

- How to put on wood, fibre and metal shingles.
- How to lay gravel roofs.
- How to lay tin roofs.
- How to hang doors.
- How to frame windows.
- How to put on sheathing.
- How to put on siding.
- How to put on exterior trim.
- How to do cornice work.
- How to build stairs.
- How to lath.
- How to lay floors.
- How to put on interior trim.
- How to put on locks and other fittings.
- How to paint.
- How to give first aid to the injured, and many other important and useful "Hows."

Wood Mortar Hods

This Hod is made of selected white pine. It is well ironed and water tight. Inside dimensions are as follows: Sides are 22 inches long and 13 inches wide.

Width across the top is 14 inches. Handle is 4 feet long. Our Hods are balanced in such a manner that makes them easier to carry than the average hod, and they are demanded by hod carriers everywhere. Please do not compare our Hod with the ordinary kinds.

No. 100—Price, each, F. O. B. Kansas City \$4.75

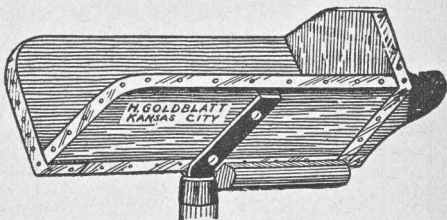

This Hod is also made of selected White Pine but not ironed so much as the one above. We find however, that this Hod because of it being smaller in size, does not require so much iron trimmings. Inside dimensions are as follows:

The sides are 21 inches long and 9 inches wide; the width across the top is 12 inches; handle is 4 feet long. A very popular Hod.

No. 100S—Price, each, F. O. B. Kansas City \$3.50

Wood Brick Hods

Our wood Brick-Hod is made of selected white pine, well ironed and otherwise the same as the Mortar Hod in general workmanship. In-

side measurements are as follows: Sides are 20 $\frac{1}{4}$ inches long and 7 inches wide. Width across the top is 10 in.

No. 200—Price, each, F. O. B. Kansas City \$3.00

Galvanized Steel Mortar Boxes

Our Heavy Duty Steel Mortar Boxes are a great improvement over the wooden mortar box: does not leak and has no rough edges to catch the hoe while mixing mortar. This box is easy to handle and can be readily placed on a wagon and moved from job to job. No tile layer, plasterer, mason or contractor should be without one. Made of No. 16 gauge galvanized steel with $1\frac{1}{2}$ inch angle iron around the top. Seams are riveted and soldered.

**For the
Carpenter and
Building Contractor**

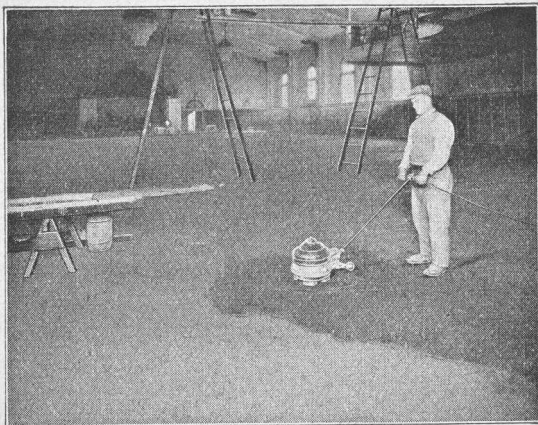

**Sandpapering
Refinishing Old Wood Floors
Waxing and Polishing
Scrubbing**

The most economical machine on the market because it will do different kinds of work requiring several machines of other makes. It is successfully used in small quarters as well as large areas. Simple to operate, easily moved about, durable and practically fool-proof. Will produce a finish superior to any other machine. The machine is operated directly from the ordinary lighting socket. Cost of electrical power to operate from 1 to 3 cents per hour, depending upon the kind of work the machine is used for. For prices of machine and attachments see page 102.

Goldblatt Tool Co.,

Kansas City, Mo.

The Electric Rotary Machine Surfacing and Polishing Marble

Finishing one of the largest marble floors in Kansas City.

On ordinary new marble tile floors, one machine will surface about 500 to 1,000 square feet per day, and on some well laid floors we know of many cases where as many as 1,400 square feet per day have been rubbed and polished.

This average is based on marble floors of average density. The use of our machine insures the work being done in a uniform manner, free from unevenness and irregularity so noticeable where hand rubbing is done or surfacing with some other type machines.

In Marble Works the machine is of great value where large slabs and other flat surfaces can be rubbed and polished in any part of the plant without moving these large, bulky pieces to rubbing beds.

Another valuable feature is that the machine can be easily operated in small quarters such as Bath Rooms, Vestibules, Sun Parlors, Porches, around Wash Stands and the like, which cannot be accomplished with truck type machines.

Rubbing and polishing can also be done on a bench, the handle being adjustable to any angle desired. For this work we supply a special handle.

The weight of the machine with attachment and rubs for this work is about 100 pounds and if desired this can be increased by about 25 pounds.

We have tried a great many machines but yours have proven far superior. We are now using three Electric Rotary Machines.

THE AMERICAN & VENETIAN MARBLE COMPANY
Kansas City, Mo.

We have been using two of your machines. They do good work and are very easy to operate.

The Electric Rotary Machine Special Exclusive Feature

For cove base, wainscoting side walls, stairs, etc., our special cog-driven, universal four-jointed, flexible shaft has become extremely popular. This device is attached direct to the Electric Rotary Machine as shown in the above illustration. It requires only a few minutes to put on this attachment.

It is very easy to handle and of unusual strength and efficiency. Our users all agree that this special shaft does far superior work than could be done by hand and the saving of labor alone would pay for the attachment within a few days.

Various sized and shaped grinding and polishing stones can be used with this attachment, in order to work in places having limited space.

We have been using your Electric Rotary Machine for several years and found it very satisfactory in all its branches, especially so in polishing terrazzo base, wainscoting, treads and risers and have also used it for polishing cement columns in large buildings to great advantage.

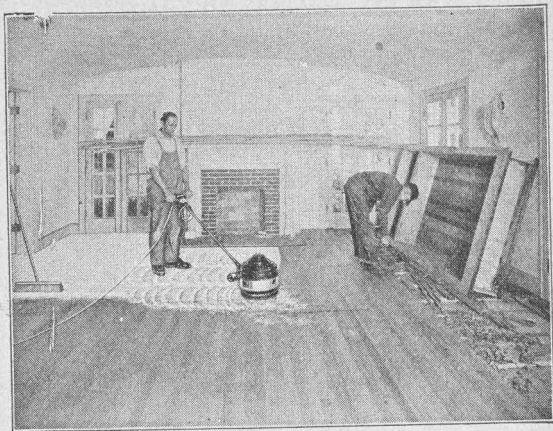

To any one in the market for such work, we could frankly recommend your machine.

THE ITALIAN MOSAIC & MARBLE CO.
Buffalo, N. Y.

**Hundreds of Machines Sold 10 and 15 Years Ago Are
Still in Daily Use Today**

The Oldest and Largest Exclusive Business of Its Kind

The Electric Rotary Machine Sandpapering

The amount of sandpapering that can be done in a specified time, of course, depends entirely on the condition of the floor, and the grade of work desired. The machine will do as much as 3,500 square feet in one day, and then again not to exceed 500 to 600 square feet. Naturally where the matching is poor or the laying is faulty, it will take longer than on more select lumber and where the laying is good. The hardness of the lumber also determines the cutting speed.

Any imperfections in a floor are magnified when finish is applied. The Electric Rotary Machine will produce a sanded surface far superior to any other machine on the market, leaving the floor absolutely free from planer, sanding marks, fluff, "waves" and other imperfections.

Another important feature is that the machine can be operated right up to the baseboard and within about two inches of extreme corners.

Refinishing Old Wood Floors

For removing old finish expensive "varnish removers" are not required. With our special made steel wire refinishing brush attached to the machine, and a solution costing but a few cents for each room (living room size) the old finish is completely removed, and the wood thoroughly cleaned in about one-tenth the time required by hand methods.

We have used the Electric Rotary Machine for sanding both new and old floors, and found that it does better work than any other machine that we ever used or saw in operation.

The machine does perfect work and is very easy to operate.

Rub Brick Holders

For those not having enough use for a floor surfacing machine, we suggest this Rub Brick Holder. Handy for rubbing down a small job. Size 8x6x2 Rub Stones are used in this holder.

No. 1600—Price, each, F. O. B. Kansas City.....\$3.00

Below is one of many unsolicited testimonials—Read it.

Dear Sirs:-

Some time ago I received from you some chisels and other tile settlers' tools and I wish to say that I found them to be of excellent quality. Enclosed please find money order for \$8.95 for one of your Tool Cases. Please mail me one of your catalogs also.

Yours truly,

H. N. GRONINGER,
128 King St.,
Charleston, S. C.

In War and In Peace

Regardless of the many concerns who, it is said, have done much profiteering in the past few years. We are glad to be able to say that we hold the record of

No Profiteering

And our customers and users of GOLDBLATT Tools have appreciated this. It is therefore

A Compliment

that brings us far more happiness and pleasure than the profiteerer can boast of.

We Are Proud of

this record which we have attained. It's worth more to us than any dollar or hundreds of dollars that could have been obtained through inflated values, and

This Reputation

for honest dealing and fair treatment is a policy which we will pursue in the future as in the past.

Sincerely,

GOLDBLATT TOOL CO.

We ship tools to all parts of the United States

A New Combination Transit-Level

Our "Sterling" Convertible Level should be of interest to every Architect, Building Contractor, Construction Engineer and all others requiring the use of an accurate, efficient and dependable Level for quickly establishing levels, lines, angles, etc.

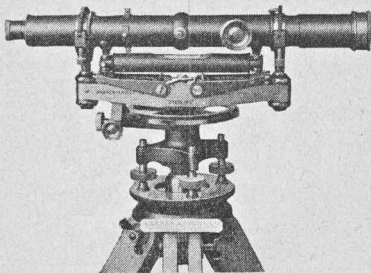

Fig. 1

Now As a Level!

This Instrument possesses, in addition to all of the requisites of a high grade Level, a device consisting of two permanently attached hinged uprights for instantly converting the Instrument for use as a Transit with a range of over 45° of elevation and depression in the vertical plane. A single movement of a very ingenious Lock Lever secures the uprights and Telescope in accurate vertical alignment. The construction is so simple that it can be changed in ten seconds from a Level for use as a Transit and back again as quickly, without jarring the Instrument out of level.

The uprights when not in use are folded down against the Level Bar affording unobstructed view of the Level Vial when the Instrument is used as a level (see Fig. 1). Fig 2 on page 106 illustrates the process of mounting the Telescope in the hinged uprights for use as a Transit, the Telescope being held in such position that the uprights will engage the Telescope Trunnions provided for that purpose.

In Fig. 3 (see page 107) the Instrument is shown with the Telescope mounted in the uprights ready for use as a Transit. No detachable parts are required in making this change and as the device is self-contained there are no loose parts to be lost or mislaid—a feature of particular value in field work.

(see next page)

You will be well repaid for a few minutes spent in studying the "Sterling" Convertible Level, for in addition to its patent quick-change feature it possesses many radical improvements and exclusive advantages not found in the ordinary Builders' Level, and yet is so simple in construction that with a half hour's practice it can be mastered completely.

Fig. 2

**See It Changed!****Specifications****Model No. 40**

Telescope— $13\frac{1}{2}$ " long, well balanced and dustproof throughout. $1\frac{1}{4}$ " aperture, clear flat field and abundant light. High power Eyepiece with improved spiral screw focusing head. Minimum focus about four feet.

Level Vial—5" long, ground and graduated, value 60 seconds.

Wyes—Strong and low set, provided with patent quick opening Lock Screws.

Level Bar—Government bronze, reinforced and cast in one piece with center spindle.

Horizontal Circle— $4\frac{1}{4}$ " diameter, retained frictionally by spring tension and can be instantly set to zero; graduated to degrees and numbered in quadrants, the slant of figures indicating the direction of reading. Vernier conveniently located at 45° to line of sight, reading to five minutes.

Center—Long tapered, cast integral with bar. Reinforced non-cramping Leveling Head. Leveling Screws provided with permanently attached ball socket shoes. Clamp screw and slow motion screw for accurate setting.

Shifting Plate—Providing full $\frac{3}{4}$ " shift on Tripod for quickly setting up Instrument exactly over any given point.

Continued on next page.

Goldblatt Tool Co. Kansas City, Mo.

Specifications of Model No. 40 (Continued).

Convertible Device—Self contained, consisting of two permanently attached hinged uprights for instantly converting Instrument into a Transit with a range of over 45° of elevation or depression in the vertical plane. Spring tension trunnion clips for frictionally retaining Telescope in any desired position.

Lock Lever—A single movement locks Uprights and Telescope securely in accurate vertical alignment.

Finish—Leatherized and gold lacquered.

Carrying Case—Hardwood, with accessories, including Meta Trivet for setting up Instrument on a wall, window sill, etc.

Weight—9 lbs. Solid-leg Tripod, 8 lbs.

An examination and test of our Model No. 40 will serve to emphasize its superiority in every respect. By the employment wherever possible of labor-saving machinery and also by quantity production, we are in position to offer it at a price within reach of all.

Cementers' or Pavement Workers' Knee Pads

**You Cannot Afford to Be Without Them
at Only \$2.75 a Pair**

They prevent rheumatism, pneumonia, stiff neck and lumbago. They relieve the backache which usually comes with kneeling, because the pressure on the knee cap is almost entirely eliminated by the use of these Pads.

The above reasons are the most important ones in favor of our Knee Pads. You should use them, too, because they will prevent torn and ragged working garments, and they will make you more comfortable when kneeling.

They are made of best quality harness leather and lined with a durable soft felt. Shaped and made to please you. They will surprise you for quality and workmanship, and the price is only, per pair.....\$2.75

F-3 Material Barrow**With Angle Steel Legs and Braces**

The very best all-around general purpose barrow made—Tray No. 16 gauge pressed from one solid sheet of steel, without seam or rivet, with heavy rod rolled in edge, 29x36 inches on top. Wedge is placed under tray. Frame is selected hardwood and is thoroughly braced and bolted. Wheel is 16 inches in diameter, 1 3/4-5-16 inch tire, 1/2-inch spokes, and runs on a 5/8-inch steel axle, held to handles by heavy lugs. Weight per dozen, 825 pounds. Do not confuse these barrows with barrows having a rolled edge, but without a steel rod rolled in it.

Price, each, F. O. B. Kansas City.....\$7.40

F-4 Goldblatt Mortar or Concrete Barrow

Just the thing for contractors, cement and concrete workers. It carries a man's load. Tray made of No. 15 steel, measures on top, 28x36 inches, on bottom, 20x21 inches. Depth at wheel, 18 1/2 inches, at handle end, 9 inches, has heavy rod rolled in edge. Handles are heavy, of selected hardwood. Legs and braces of angle steel. Heavy steel wheel, 16 inches in diameter, running on a 5/8-inch steel axle through lugs bolted on under side of handle. Weight, per dozen, 900 pounds.

Do not overlook the fact that the above barrows have a steel rod rolled in the edge of the tray. Also notice the steel shoes.

Price, each, F. O. B. Kansas City.....\$7.95

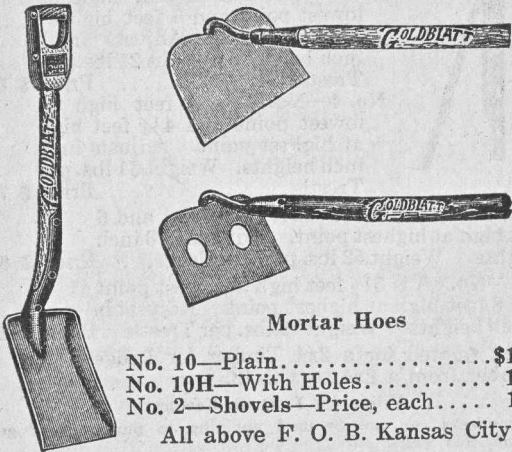

Credit checks can not be used applying to purchases of goods shown on this page.

Bricklayers' or Masons' Scaffolds

Are 4½ Feet in Height.

also

Plasterers', Stuccoers' and Interior Decorators' Scaffolds

Are 6 Feet in Height.

They are placed along the side of the wall the same as the old wood horses.

They may be spaced any distance apart you desire (to suit the length of your scaffold boards). You cut the Ledger Timbers any length—to determine the width of the scaffold.

Any height scaffold may be built, as one trestle clamps on top of the lower one with a clamp bolt. You may build it 10 trestles high and it will be as rigid at the top as it is at the bottom (which is more rigid than it is possible to build the old wood scaffold).

NO NAILS are used in building this scaffold. COMMON LABORERS set it up, which keeps the cost of erection down to the lowest point. It is built in less than one-half the time required to build a wood scaffold and it is taken down in one-fourth the time required to wreck a wood scaffold.

As no nails are used—the timbers are uninjured and may be used over and over again.

No Nail Pulling After Wrecking.

No Put-Log Holes to Patch.

When not in use, the trestles and timbers can be stored in a very small space.

As for STRENGTH, they will support three or four times the weight that you are likely to place upon them in ordinary use.

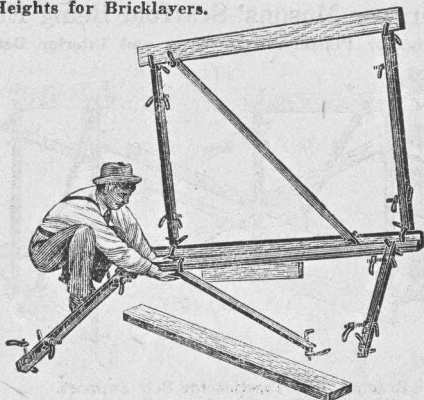

Weight of Man and Brick, 6,850 Pounds.

**CONCRETES, CEMENTS, MORTARS, PLASTERS
AND STUCCO. By Fred T. Hodgson.**

548 Pages, 150 Illustrations, 12mo,
Cloth \$1.75

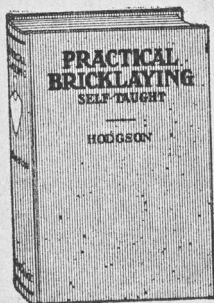

A complete and reliable guide for the preparation and use of plastic building materials of all kinds. This work deals in detail with the selection, proportioning and application of all generally used materials as employed to secure the forms, grades and styles of construction required in modern building operations of this class.

The following are among the subjects receiving extended treatment: Processes and methods of work; tools and equipments; kinds of cements and concretes with their proper uses; moulding, finishing, cornices and special effects; reinforced concrete. Fully indexed.

**PRACTICAL BRICKLAYING—SELF-TAUGHT
By Fred T. Hodgson.**

278 Pages, 300 Illustrations, 12mo,
Cloth \$1.50

A guide to better results for the working bricklayer. This volume is designed for self-instruction of those engaged in the trade, as well as for apprentices; and is planned to allow the application of the methods and principles to everyday practice as the reader's skill is developed by progress through the instructions.

Includes the following: laying foundations, bonding, arching, gauged work, damp courses, coping, bridges, piers, chimneys, flues, fireplaces, corbeling, cornices, paneling, pilasters, plinths, and all forms of plain and ornamental brickwork. Indexed.

MODERN ESTIMATOR AND CONTRACTORS' GUIDE. For Pricing All Builders' Work. By Fred T. Hodgson.

318 Pages, 76 Tables. Illustrated. 12mo, Cloth.....\$1.50

A book which explains in detail a large number of simple and practical methods for estimating the cost of all classes of contractors' building work. Typical examples of estimating are fully worked out and the most used information is presented in tables suited for ready reference.

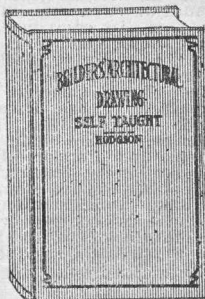

Labor, material and general overhead costs are developed for each kind of work, including excavating and drains; foundations and brickwork; carpentry and roofing; masonry, plastering and paperhanging; plumbing, hardware and finishing; painting and glazing. Fully indexed.

BUILDERS' ARCHITECTURAL DRAWING—SELF-TAUGHT. By Fred T. Hodgson, F.A.I.C.

336 Pages, 250 Illustrations and 18 Folding Plates, 12mo, Cloth Binding Price, each.....\$2.00

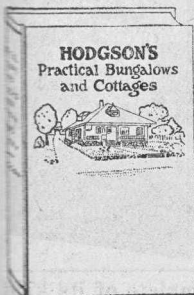

This work is especially designed for carpenters and for students of architecture, woodworkers and others who desire to learn drawing at home and who have not the means or opportunity to take a course in school or college.

The work commences with a description of drawing instruments and accessories, with rules for using them, and hints as to their care and management. Rules for laying out simple drawings are given, and the student is taught step by step to draw to scale, first the plans, next the elevations, and finally the details of a cottage, including foundations, walls, doors, windows, stairs and all other items required for finishing a small building.

PRACTICAL BUNGALOWS AND COTTAGES FOR TOWN AND COUNTRY. By Fred T. Hodgson and E. N.

Braucher. 12mo, Cloth, 420 Pages, 400 Illustrations. Price, each. \$1.00

This work contains perspective views and floor plans of over two hundred choice bungalows, cottages, houses and flat buildings, selected with great care to combine architectural beauty, convenience and economy of construction, ranging in prices from \$500.00 to \$3,800.00. Every plan shown is made by a licensed architect and has been built from. This work will be found invaluable to the home builder, furnishing many new and up-to-date ideas and suggestions. We are prepared to furnish blue prints at a very moderate cost ranging from \$5.00 to \$15.00, according to cost of erection, consisting of floor, roof and foundation plans, front, side and rear elevations, with complete type-written specifications.

CEMENT FOR FARM AND TOWN

By **H. COLIN CAMPBELL**
C. E., M. D.

Consulting Concrete and Sanitary Engineer
Chief of Bureau of Publicity Portland
Cement Association

Copyright 1920

380 Pages with 250 Illustrations

A compact and comprehensive manual for the cement contractor and for all users of cement and concrete. A brief history of cement is given, with its general properties, its uses and how it should be handled. Concrete, in its manifold structural relations, is fully covered—its component parts, the qualities they should contain, how they should be combined, mixed, placed, etc.—Tools used—Forms—Concrete Block and Brick—Stucco Surface Finish—Walls—Foundations, Roofs, Floors and Walks—Reinforcing Concrete—The Use of Concrete on Large and Small Structures—Uses of Concrete on the Farm, Fence Posts—Walks—Floors—Troughs and Tanks—Milk Houses—Silos—Cisterns—Machine Shed—Fences—Walls—Septic Tanks—Fruit and Vegetable Cellars—Steps and Porches—Hog Wallows—Manure Pit—Ice House—Smoke House—Poultry House—Hog House, Culverts, etc.

Tables of Dimensions are given in connection with the Drawings, making the instructions easy to comprehend by even the amateur cement and concrete worker.

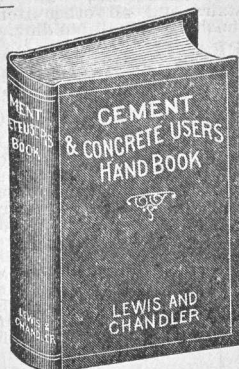

This Book is worth \$1.00 for every page in it; at this rate it would be worth \$380.00 and the price is only:

Cloth Binding, Price..... **\$2.50**

CEMENT AND CONCRETE USERS HAND BOOK

By **Myron H. Lewis**. Everything of value to the concrete user is contained, including kinds of cement employed in construction, concrete architecture, inspection and testing, waterproofing coloring and painting, rules tables, working and cost data. The book comprises thirty-three chapters. A valuable addition to the library of every cement and concrete user. Cloth 430 pages, 126 illustrations.

Price..... **\$3.50**

Our Book Department is the Most Complete of its kind

Concrete Pottery and Garden Furniture

By Ralph C. Davison

This book describes in detail in a most practical manner the various methods of casting concrete for ornamental and useful purposes, and covers the entire field of ornamental concrete work. It tells how to make all kinds of concrete vases, ornamental flower pots, concrete pedestals, concrete benches, concrete fences, etc. Full practical instructions are given for constructing and finishing the different kinds of molds, making the wire forms or frames, selecting and mixing the ingredients, covering the wire frames, modeling the cement mortar into form, and casting and finishing the various objects. Directions for inlaying, water-proofing and reinforcing cement are also included.

These directions have been supplemented with many half-tone and line illustrations which are so clear that no one can possibly misunderstand them. With the information given in this book

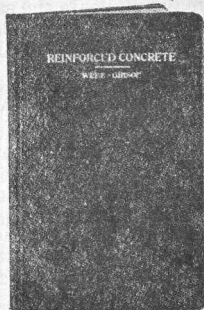

any handy man or novice can make many useful and ornamental objects in cement for the adornment of the home or garden. The author has taken for granted that the reader knows nothing whatever about the material, and has explained each progressive step in the various operations throughout in detail. The information on color work alone is worth many times the cost of the book.

5¼x7½. 196 pp. 140 ill. \$1.95

REINFORCED CONCRETE

By Walter Loring Webb, C. E.

Consulting Civil Engineer; Author of "Railroad Construction," "Economics of Railroad Construction," etc.; American Society of Civil Engineers; and W. Herbert Gibson, B. S., C. E., Consulting Engineer, Specialist in Reinforced Concrete, American Society of Civil Engineers. 240 pp., 119 illus. Flexible binding. A condensed practical treatise on the problems of concrete construction, including the general theory of flexure in reinforced concrete, the design of the ordinary beam and girder type of floor, bonding of steel and concrete, vertical shear, diagonal tension, and tables and diagrams by means of which designs may be made without the use of other portions of the text. Partial contents as follows: Composition and treatment; Concrete mixtures, Mixing and laying concrete, Water-proofing concrete, Preservation of steel in concrete, Steel for reinforcing concrete, General theory of flexure. TEXTURAL FINISHES IN PORTLAND CEMENT STUCCO

**By SAMUEL WARREN, Manager Atlas-White
Department, The Atlas Portland Cement Co.**

Owners of houses are no longer satisfied with just the ordinary old time stucco finishes such as the spatter dash, rock dash, stipple and sponge. They want their house to look different from the house next door. Particularly is this getting to be a problem when with the rapid growth in the use of stucco, there are many such houses side by side.

With portland cement stucco, there are so many finishes and colors available that there hardly need be two houses with identical stucco finishes at least in any one city. Atlas-White portland cement in the finish coat gives the many varieties of color and the nature of the material, due to the fact that it is so permanent that it needs no rock dash to protect it allows you to secure countless textures.

First of all there are salient points in putting on the stucco that should be watched. A safe mix to use and it is best to make all coats the same, is one bag of portland cement, three cubic feet (3 bags) of sand and five pounds of hydrated lime. Never make the finish coat any richer than the base coats.

If you are putting the stucco on a sheathed house, always have the sheathing horizontal and never diagonal. Tie the metal lath together at the joints so securely that it is just as though it was one continuous sheet. Never nail the lath flat on the sheathing unless it is self-furring lath. The purpose of the lath is not just a roughness on which to hang the stucco, but a continuous sheet of reinforcing for the stucco.

Don't apply stucco on a very hot windy day or all the water that the cement needs will be sucked out. Apply the second coat the day after the first if wanted, but don't put on the finish coat for at least a week. After the second coat is on, keep it wet with the hose for several days. Scratch each coat thoroughly to receive the next.

When applying stucco to brick, concrete block or hollow clay tile, never cover them with any kind of a waterproofing material. Wet them down to prevent too much suction and apply the stucco directly. (For further information send for our book on this subject.)

When ready to use this check tear off carefully at dotted line.

OFFICE & SALESROOMS
1522 WALNUT STREET

In Celebrating Our 40th Successful Year of Tool Making

We are giving away \$40.00 to each of our customers.

This is \$1.00 for each year we have been in business.

This \$40.00 will be found stitched among the pages in this Catalog in the form of eight checks, of which this is one.

Each of these checks will be good only when sent in with, and applied as part payment, of an order and cannot be used in any other way or at any other time.

Option A—This check will be accepted as \$5.00 in cash on purchases of \$55.00 or over.

Option B—This check will be accepted as \$2.50 in cash on purchases of \$27.50 or over.

Option C—This check will be accepted as \$1.00 in cash on purchases of \$11.00 or over.

No scheme. No trick. We do not have to scheme or use tricks.

Forty years in business and every customer is our friend.

We are simply presenting these checks to our customers at our own free will and with our compliments, in celebration of our 40th year in business. You are, therefore, welcome to apply these checks as part payment of your purchases.

Good only when sent to the Goldblatt Tool Company, Kansas City, Missouri.

(There are a few items to which these checks cannot be applied. These items are so marked in our Catalog.)

The Oldest and Largest Exclusive Business of Its Kind

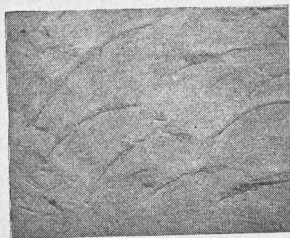

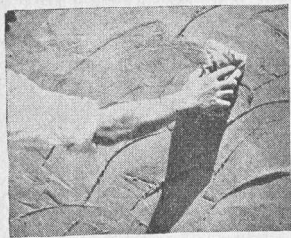

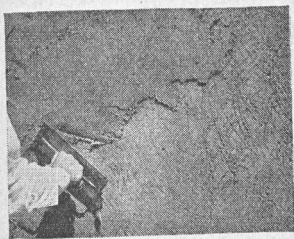

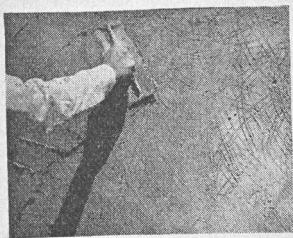

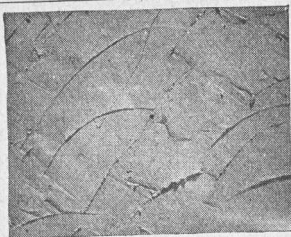

The coloring of stucco is done by using Atlas-White Portland Cement for the finish coat. This is true, full strength portland cement and the only difference between it and the ordinary grey cement is this difference in color, as far as stucco is concerned. Best color results are secured by using a sand of a good color that gives with the white cement the color desired. For instance, a dark yellow sand and white cement gives a very attractive buff color. Experiment with your local sands and see what colors you can get.

If the proper colored sands are not available, use a white or light colored sand and mix with them colored pigments. These can be secured from many reliable firms but be sure that they are intended for cement use for the many of the ordinary oxides are not permanent. Usually from two to five per cent will give enough color but never use more than ten per cent. When using pigments in order to get a uniform color, it is best to weigh out the amount of pigment required for each bag of cement and put it into little paper bags. Screen the cement and color together thoroughly before adding the sand. If not the water is likely to make the color collect into solid balls that are hard to break up and leave streaks in the wall where the trowel cuts them.

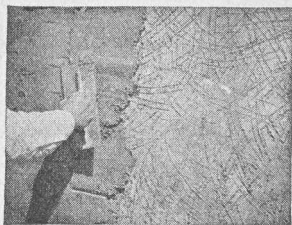

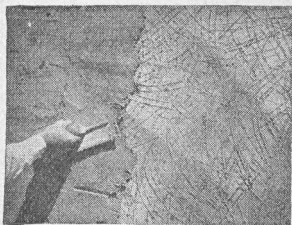

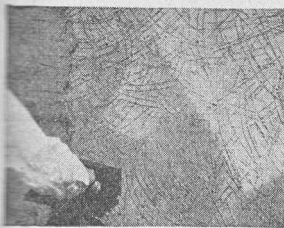

The securing of different textures is not easy to explain in writing but the pictures on the following pages should show how to go at it. Look at them carefully and then experiment. It is just a trick of the wrist. No special tools, just the ordinary plasterer's trowel and perhaps a burlap bag.

These pictures show several types of textures. These are just suggestions of some that have been developed. Experimenting will show you how many others can be secured. Try them out. It means more widespread use of stucco as it is so much more interesting.

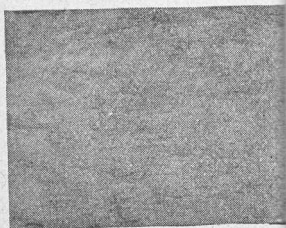

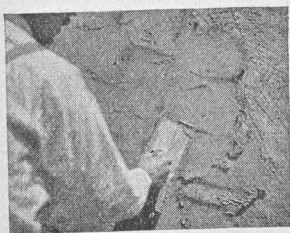

Make the size of the texture correspond to the distance from which the house is to be seen. If the house is usually seen from a distance of one hundred feet, then the texture should be coarse enough so that it can be seen at that distance but if the house comes out to the sidewalk, make the texture much finer.

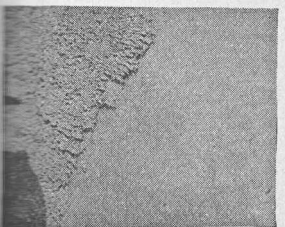

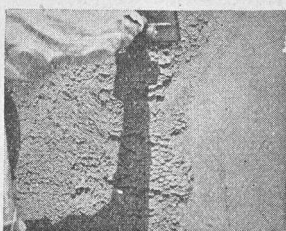

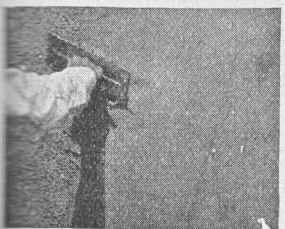

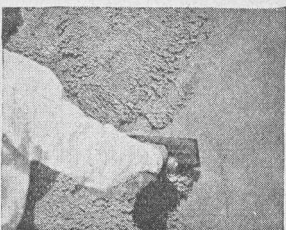

In this finish, the motion is roughly horizontal in broad, sweeping strokes from the shoulder, and not the elbow. The material working past the end of the trowel leaves slight ridges, and no attempt is made to remove these. The trowel is lifted at the end of the stroke. It is held at such an angle to the wall as to leave a smooth surface. Rub with a bag when it has partially set.

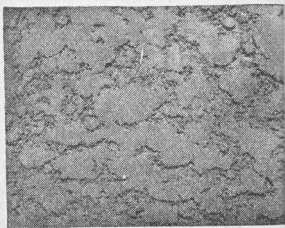

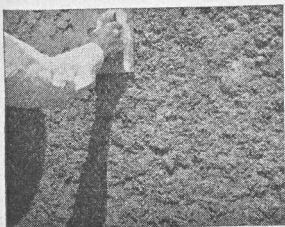

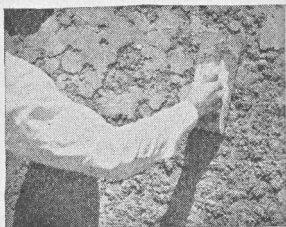

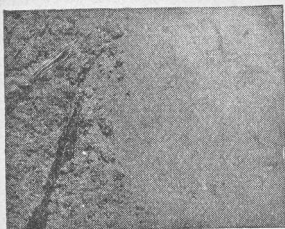

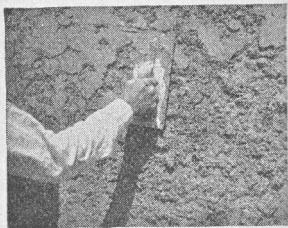

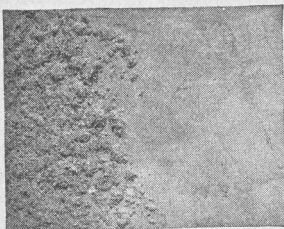

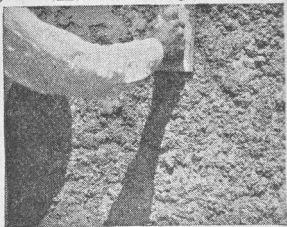

The effect is secured by the manipulation of the finish coat only. The finish coat is applied in irregular thickness, but the variations in the thickness should not be more than one-eighth inch, or a quarter at the maximum. The "lumps" should be roughly horizontal to give the effect of underlying courses of stone. Care must be taken to see that they average

horizontal, as the mason will usually give them a slight pitch to the right. Their size should correspond roughly to the size of the projection of a one-man stone. Major irregularity should be roughly worked out with the trowel, and after setting for an hour or so, the surface should be vigorously rubbed with a burlap bag.

The motion of application is from the bottom up. A full trowel of material, holding the trowel at a sharper angle to the wall than usual, is given a free, powerful stroke, so that the mortar is spread along a length of several feet. At the end of the stroke, the trowel is lifted. Spots that are not covered at the first stroke are covered by a complete new sweep, rather than by a small amount.

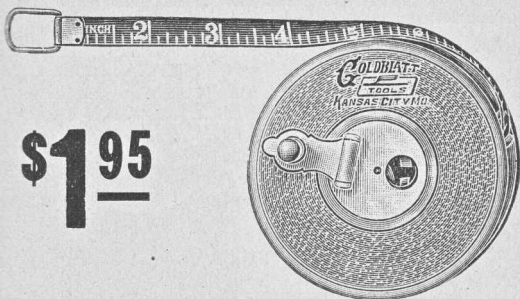

Over the base coats a thin layer of the finish coat mixture is applied, followed immediately by a spatter dash of the same mixture thrown on with a whiskbroom or a bundle of twigs. Before this has set, the projections are lightly troweled down with a steel trowel held almost flat against the surface.

An attractive polychrome effect may be obtained by applying a thin layer of the finish coat in one color and then spatter dash in another color.

This Is a, Real Sensation—50 Foot Steel Tape

\$1.95

If it was made of tin it would be worth this price. But it is made of steel—an honest to goodness genuine 50 foot Steel Tape—as good as many \$4.00 and \$5.00 ones.

If you don't buy one, you are the loser. This is enough said.

Credit checks of any kind will not be accepted in full or part payment of the above Steel Tape.

Jan. 21, 1924.

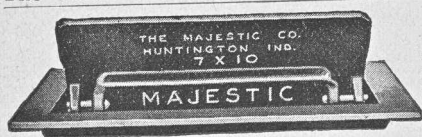

Dear Sirs:

I am sending you under separate cover one pair of level sights. These are perfectly all right, but I recently purchased a transit and wish to exchange these for the following goods on the order sheet. Inclosing check for the difference. I do not see how you can lose a customer after he has once purchased from you. You sure treat them right and your tools can't be beat. I think this is about the tenth or eleventh order I have from you and always satisfactory, thanks.

Yours respectfully,

L. H. KUCK,
Wapakoneta, Ohio.

TILE DEPARTMENT

Ceramic Mosaic Floor Tiles

In addition to the Tile shown on next few pages we can also furnish the 1"x1½" White Ceramic Floor Tile, or in colors in either the basket weave or herring-bone style. In the white the price is 45c per sq. ft. mounted on sheets.

We can also furnish the White Ceramic Floor Tile or in colors in either the 2" and 3" hexagon or the 2" and 3" square—not mounted. In the white color either of these two sizes are 65c per square foot.

To every five hundred feet of 1" Hexagon Tile there is required 4 square feet of five point fractions and 3 square feet of four point fractions. One square foot of fractions weighs 2¾ pounds. Price of fractions, 40c per square foot.

Packing charges applying to Tile—

Boxes, each	\$.50
Barrels, each	1.50
Crates, each	1.50

Be sure and figure packing charges on following basis:

56 sq. ft. Floor Tile to a box.
60 sq. ft. Wall Tile to a barrel.
15 sq. ft. Hearth Tile to a box.
12½ sq. ft. Quarry Tile to a crate.

Send Us a Rough Sketch of Work to Be Done—When ordering Tile Floors, Wainscoting or Fireplaces send us a rough sketch of the spaces you wish to tile, and show the location of doors, windows, etc. You needn't draw a sketch to scale. Don't be afraid of giving us too much information—we need it to help you.

Red Quarry Tiles

Are the best American Quarry Tile made for fireplace facings, hearths, interior floors, wainscot, porch floors and wall.

They come in 4"x4", 4"x6", 9"x9" and 6"x6" in size. We aim to keep a stock on hand. If any large quantity should be wanted it is advisable to allow plenty of time for shipment and write us for special price on quantities.

The Catalog with the Yellow Cover

Thru the Gothic Door in the front of our Office Building shown above, your orders are delivered directly to the desk of Mr. Goldblatt. Every order, large or small, is carefully scrutinized and given his personal attention before going in to the shop for execution, so that you are sure to secure tools exactly as you want them. When you desire some special shape or design don't hesitate to mention same in your order inasmuch that Mr. Goldblatt will personally look after your special wishes.
